## FOX Releases a New White Paper on Flare and Combustor Gas Monitoring!

FOX Thermal Instruments proudly announces the publication of the White Paper titled "*Flare and Combustor Gas Measurement: Applications, Regulations, and Challenges*". This white paper describes the various regulations that are having an impact on the industries where flares and combustors are being used. The most widely affected industry highlighted in this paper is the Oil & Gas Industry as it uses flares and combustors in great numbers to burn waste gas. This white paper can be used as a convenient guide for industry professionals that need a flow meter technology for accurate measurement of challenging flare and combustor gas flow rates.
