

FT2A Wins 2014 Innovation Award from Flow Control!

Flow Control recently announced that the Model FT2A Thermal Mass Flowmeter & Temperature Transmitter has won the 2014 Innovation Awards! As demand has increased in broadening markets, FOX engineers determined that upgrading the design and features of the FT2 would further raise quality and add to the customers' overall user experience. With this in mind, FOX took a hard look at its most trusted product, brought it back to the drawing board, and revolutionized the design of the flow meter in order to offer FOX customers an even more robust flow meter for harsh industrial environments: the new Model FT2A. Furthermore, to expand to the Building Automation industry, FOX has broadened the communications options available to include BACnet MS/TP. [Learn More](#)

Watch our New Video on Efficiency

Packed with great information about FOX technology, products, and applications, this new video by FOX shows you how to gain efficiency using thermal mass flowmeters by FOX.
