

# Gas-SelectX®

## Gas Calibration Selection Tool

- Selection of common gases such as air, natural gas, methane, carbon dioxide, and more.
- Selection of gases commonly found in flare and vent applications for Oil & Gas industries such as methane, ethane, propane, butane, and more.
- Quick access to gas settings through meter display.
- Easily selectable gases through pop-up windows and pull down menus using the free FT1 View™ or FT4A View™ PC software tools.

## Gas-SelectX® Gas Selection Tool

FOX understands that for a variety of common gas monitoring applications, customers search for a meter that is easy to install and configure. The newly expanded Gas-SelectX® feature is a tool available on the FOX Models FT1 and FT4A gas flow meters. Gas-SelectX® allows the user to select pure gases or gas mixes from a variety of gases available in menus... with the click of a button!

The Gas-SelectX® firmware continually runs in the meter. When the user changes the selected gas/gas mixture, the firmware automatically applies corrective algorithms to ensure measurement accuracy is maintained.

## View/Change Gas-SelectX® Gas or Gas Mix Data from Your PC

The Gas-SelectX® tool can be easily accessed and configured from either the meter's display buttons or by using free software tools available for use on a laptop or PC and connected via a USB port on the meter.

The intuitive and easy-to-use FT1 View™ and FT4A View™ software gives process engineers and maintenance personnel a real-time view of process conditions. The main window of the software displays all of the flow meter's parameters and process variables.

The software also allows the user to access Gas-SelectX® to view available gases offered in a pop up window. In this window, the user is able to view the current gas calibration information or choose from gas options in the gas selection menu.

## Available Gas-SelectX® Gases and Gas Mixes

The Model FT1 has a choice of pure gases or a 3-gas mix of any gases in the *Pure Gas Menu*. The Model FT4A also has a choice of pure gases or a mix of any gases from the *Mixed Gas Menu* and *Oil & Gas Menu*.

<i>Pure Gas Menu</i>	<i>Mixed Gas Menu</i>	<i>O &amp; G Menu</i>
FT1/FT4A: Choose any gas	FT1: 3-Gas Mix Maximum FT4A: Unlimited Gas Mix	FT4A Only: Unlimited Gas Mix
